C.O.S.H.H. Control Of Substances Hazardous to Health

- 1** Be sure you can read all labels and follow instructions for use. 
- 2** Use the protective clothing provided. 
- 3** Do not mix chemicals. Mixing chemicals can kill. 
- 4** Never put chemicals into unmarked containers. 
- 5** Never put chemicals into bottles or containers with other uses, i.e. eating and drinking. 
- 6** Be sure you know the first aid treatment required if you accidentally spill chemicals on yourself or others. 
- 7** All chemicals must be stored safely. 
- 8** Report any faulty equipment, spillage or damaged containers to your supervisor. 
- 9** Always follow the rules. Develop safe working practices around the workplace. 
- 10** If you find anything wrong report it to your supervisor.
